PROJECTS

Smart Shop | GitHub| Deployed Link
- This React application was built based on ecommerce stores for users to shop online.
- I was responsible for Deployment on Heroku using MongoDB, creating and maintaining backend and worked as an administrator in this Agile process.
- Technologies used to create this application were React.js, Redux, Bootstrap, Stripe, Node.js, GraphQL, Express.js, JWT, MongoDB, Mongoose, service workers, PWA.

Residential Matchmakers | GitHub| Deployed Link
- This application acts as a housing "dating" site where users can post their own houses and a description of their home for prospective buyers to view. Prospective buyers can comment or vote on listed postings and contact sellers to initiate the home sale.
- My role in this agile development process was to manage the project board on GitHub, work on Backend technologies and deployment on Heroku.
- JavaScript ES6, Node.js, Express.js, dotenv, MySQL, Sequelize, bcrypt, handlebars.js, Heroku, Jaws DB, jest, Insomnia.

Music Slayers| GitHub| Deployed Link

- Team Music Slayers have created an application for users to access their favorite music. It not only allows them to browse for music but also lets them search their preferred songs preview using Artists or Albums.
- Responsible for frontend development (JavaScript), GitHub project board creation and management.
- HTML, CSS, JavaScript, jQuery, Tailwind, Google Charts, GitHub, project board, GitHub.
